

SIRENA CARBON CANTILEVER GANGWAY EXTENSION

EXIT
CARBON

MADE IN ITALY

WHEN YOUR *RETRACTABLE GANGWAY* FALLS SHORT, WHICH IS THE SAFE SOLUTION BETWEEN YOUR SHIP AND THE DOCK?

It takes just a step to reach the dock, but this step could be not an easy one, when mooring close to shore isn't possible, or a tender is kept at the stern, or there is a big platform, or bigger outboard engines are installed.

SIRENA CANTILEVER Universal Gangway Extension by Exit Carbon, is the solution: it will lead you safely to the dock by extending the length of your telescopic gangway by over 1 meter.

JUST A FEW HOLES ON YOUR EXISTING TELESCOPIC GANGWAY TO GAIN MORE THAN 1 METER LENGTH

SIRENA IS COMPATIBLE WITH ANY 390 MM WIDE TELESCOPIC GANGWAY. IT CAN BE USED ALSO WITH GANGWAYS WIDTH UP TO 420 MM.

LIGHT, RESISTANT,
EASY TO USE,
MANAGEABLE

Stunningly, Sirena does not need to add stress to the supporting telescopic gangway, nor will wheels be placed on the pier. Extremely easy to deploy and its strong 6 stainless steel screws junction will assure your safety without big modification of the supporting gangway.

SIRENA LETS YOU WALK

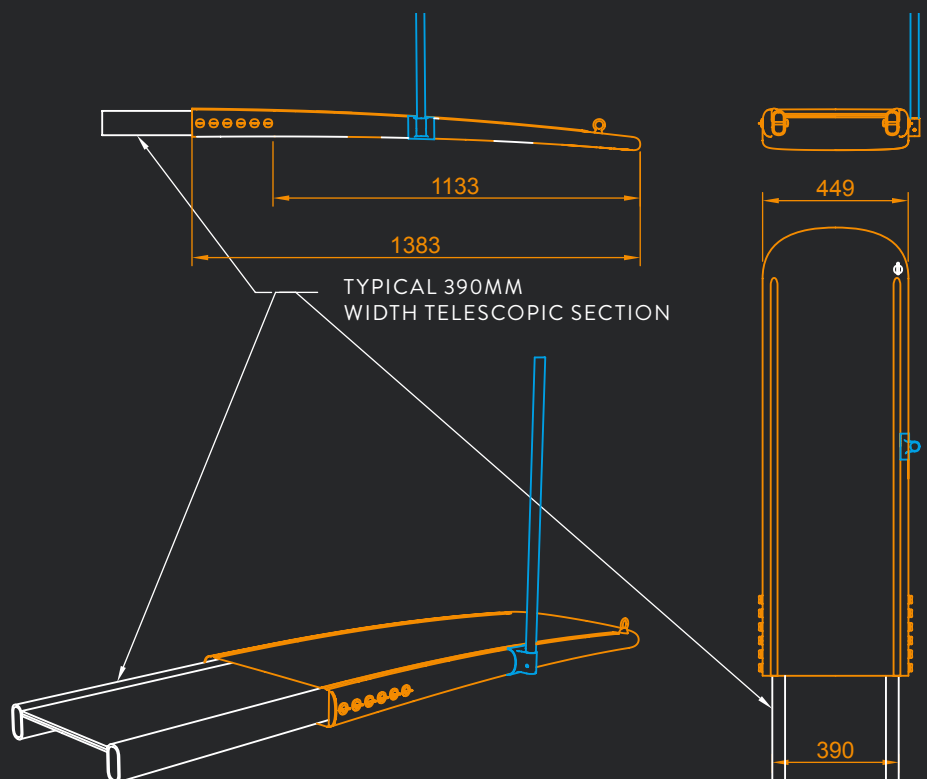

MATERIAL /
CARBON FIBRE
ANTICORODAL
DELRIN®

TOTAL LENGTH 130 CM

TOTAL EXTENSION 110 CM

WIDTH 45 CM

WEIGHT 6.3 KG
